

2GIG Technologies is pleased to announce the availability of the Wireless Touch Screen Keypad (2GIG-TS1).

2GIG Technologies is pleased to announce the new Wireless Touch Screen Keypad (referred to as the TS1). The TS1 is an excellent addition to any 2GIG system enabling users to more conveniently access and control their home security and home automation devices from any room in their home.

## FEATURES

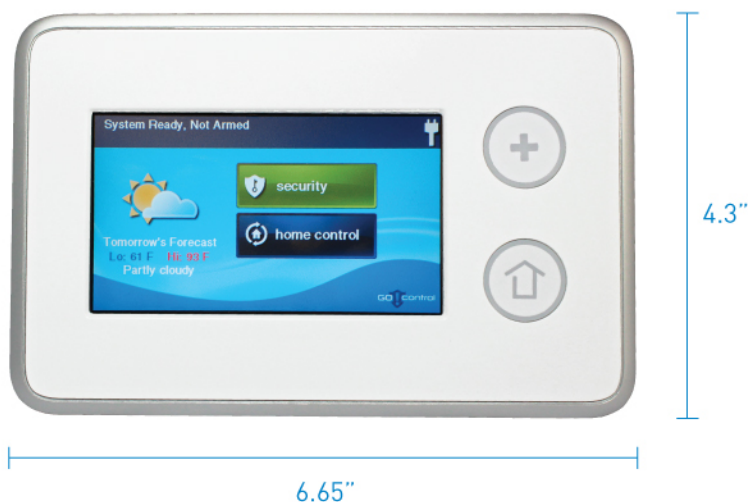

- Full color touch screen interface
- One-touch Home and Emergency navigation
- Quick and responsive bi-directional communication with the Go!Control
- Add up to 4 additional TS1 Wireless Touch Screen Keyads to 1 system\*
- Access to all Z-Wave functionality
- See and hear system status, chimes and alerts
- Screen and buttons darken completely and wake with one touch
- Same easy-to-use interface as the Go!Control

## SPECIFICATIONS

- 4.3" wide quarter VGA resolution
- Range of 450 feet
- AC operated only, non rechargeable batteries
- Operates on 14Vdc and can share the same power supply as the Go!Control panel

## REGULATORY APPROVALS

- FCC part 15
- ETL

\*Use of the new TS1 requires a Go!Control panel with the 900 MHz Transceiver installed and running system software version 1.8. Detailed 1.8 update instructions and 900 MHz Transceiver installation instructions will be provided with the products. Only one 900 MHz Transceiver is required for each Go!Control panel providing support for up to four TS1s.
